					Greenhouse-Geisser	Huynh-Feldt	Lower-bound
day	,000	75,663	27	<,001	,422	,715	,143

Tests the null hypothesis that the error covariance matrix of the orthonormalized transformed dependent variables is proportional to an identity matrix.

a. Design: Intercept + Temp + straw + resistant Within Subjects Design: day

b. May be used to adjust the degrees of freedom for the averaged tests of significance. Corrected tests are displayed in the Tests of Within-Subjects Effects table.
